

Dormers explained

We allow this configuration for the end of your house facing Aspen Mountain

You can "not" have a dormer on the back 1/3 of your house that would block a neighbors view of Aspen mountain. (No Dormer on the 1/3 of your house that is away from Aspen mountain)

The dimensions are for demonstration, they vary from lot to lot, but you are only allowed a dormer for 25% of your total roof, not including a garage in that calculation. When you do not want a dormer, you can have a shed dormer.

Examples
